- ❖ UNIX

## PROFILE

Front End Engineer with 4 years of commercial experience building and maintaining web applications. Self-motivated, confident in creating logical and innovative solutions in response to complex problems. Able to effectively self-manage during independent projects, as well as collaborate in a team setting. Demonstrated the ability to work diligently under pressure to meet deadlines

## EMPLOYMENT HISTORY

### Front End Engineer, Upstream

October 2021 – Present

Upstream is a leading mobile marketing automation and digital acquisition firm. Working on the GUI team, responsible for the development of the “GROW” mobile marketing platform built with Next.js:

- Developed custom nodes and connection edges for the interactive drag and drop, React Flow based, campaign builder
- Collaborating with the backend Engineers for the API schema design, I developed a dynamic scheduling form built with Formik. Created a complex validation schema using Yup to avoid overlapping of the time fields and handle different timezones.
- Continuously improving the code quality by transforming old JavaScript files to TypeScript by writing Unit tests
- Effectively helped one of my colleagues to complete a custom redirector feature by developing a dedicated service for the API calls utilizing React Query’s Hooks
- Refactored components that share the same state by connecting them to the Redux store and wrote custom Selector functions using the Reselect API to provide optimization and reusability.

### Front End Engineer, AGENSO

September 2020 – October 2021

AGENSO is a Leading Company in developing solutions for increased sustainability. Worked for multiple European Union funded research projects:

- Successfully Parsed, transformed and presented objects that contain complex agricultural data using vanilla JavaScript.
- Implemented custom CSS to WordPress microsites to meet the design requirements
- Implemented custom JavaScript to customize the behavior of WordPress plugins

### CMS/LMS Design and Development at COSMOLEARN

March 2017 – August 2020

COSMOLEARN is a startup e-learning company, expert in the design and development of online educational programs.

- Redesigned, developed company’s website using Wordpress.
- Responsible for the development, deployment, maintenance and administration of the clients’ Moodle LMS.
- Provided user technical support in Webinars

## HIGHER EDUCATION

BSc degree in Department of Informatics and Computer Engineering,  
UNIVERSITY OF WEST ATTICA
